

Project review - Audi Peterborough

Large expanses of glass are the hallmarks of the highly distinctive Audi dealership in Peterborough following the completion of glazing of their newly extended showroom by Lincolnshire Architectural Glazing.

The major Audi dealership in Peterborough needed additional showroom space and facilities for the latest Audi R8 and so extended their current site to accommodate the extra buildings.

Lincolnshire Architectural Glazing undertook the fabrication and installation of the distinctive curtain walling as well as large sliding car showroom entrance doors which are designed to allow cars to be moved into and out of the showroom whilst preserving a large glass display facade. Key to the success of the project was working closely with the main contractors to keep disruption to a minimum in the rest of the showroom area as well as maintaining high levels of site safety and security for staff and visitors to the site.

Products - Curtain walling and 1040 sliding doors

Contractor- Langwith Builders
