

ALUMINIUM GLAZING SYSTEMS

LINCOLNSHIRE
ARCHITECTURAL GLAZING

■ About Us

We are a highly experienced and focused architectural glazing contractor dedicated to manufacturing and installing high quality bespoke aluminium window, doors, curtain walling, shop-fronts and sloped glazing solutions to our client's individual requirements.

We have the expertise to meet your project's needs from the UK's leading system providers including, amongst others, Kawneer, Reynaers and Sapa Building Systems. The systems we offer have been selected for their uncompromising performance and the flexibility they offer to suit the many different types of projects our clients are involved with.

Throughout our history we have installed literally thousands of windows, doors, low and high rise facades in many different shapes and sizes. We believe it is our history that has given us the unique level of expertise that we bring to bear in every

aspect of our operation which all helps to ensure that your enquiry and order is handled to the highest possible standard from start to finish.

We know that constant innovation is the key to our customers' success so we constantly strive to develop our whole range in line with the changing demands of the markets they serve.

The latest products, designed to the latest standards, installed on time, every time, are what make a difference to our business and ultimately we know they will to yours as well.

■ Markets

Our knowledge and expertise allows us to offer specialist advice and guidance on installations into a wide range of building types whether new build or refurbishment and either traditional or contemporary.

■ What We Do For You

We know that time is important which is why we respond as quickly as possible to every situation. Your business is our business and we are committed to helping you every step of the way.

No matter how small or large your project you'll always find that we respond in the same way - quickly and efficiently. The in-depth knowledge we have of our products means that we can find a product solution that meets your needs every time. So you can rely on your quotation being ready when we say it will be and if we hit a problem we'll be back to you with a suggested solution straightaway.

This dynamic approach couldn't possibly stop there so we'll continue to strive to delight you when you place your order. You'll be given a delivery and installation date and we'll go out of our way to make sure we keep to our commitment of delivery on time every time. We know that your business depends on our being able to keep to deadlines.

- Installation advice

■ Our Product Range

Windows

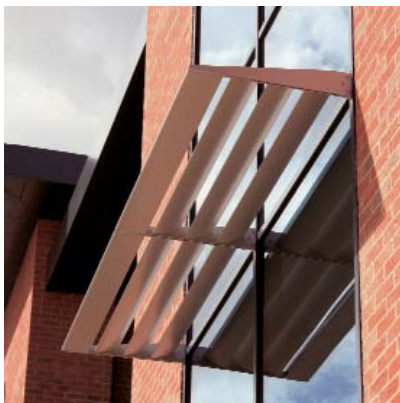

Our range of windows has been designed to meet any requirement - from traditional casements to reversible, pivot, tilt before turn and horizontal and vertically sliding configurations, using either standard or high performance energy efficient systems which deliver industry leading low U values.

Doors

Our door range offers you just as many options as our window systems. From single and double entrance doors to sliding doors for car showrooms; from sliding/tilting patio doors to the increasingly popular and stunningly attractive sliding folding doors, our range offers both standard and high performance, thermally efficient systems with low U values.

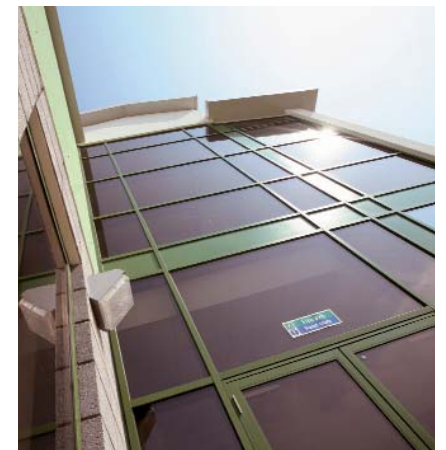

Curtain walling & Brise Soleil

Manufacturing and installing curtain walling systems depends on special levels of expertise. Our curtain walling systems combine thermal performance with ease of installation. Our Brise Soleil system allows you to respond to projects that call for an effective solar gain shading solution and a distinctive architectural appearance.

Ground Floor Treatment

Commercial entrance systems have to be robust and easy to maintain and so you can rely on our tried and trusted systems to give you a reliable solution. Our range includes industry standard hardware including automatic and manual openers and a DDA compliant low threshold cill is also available.
